WHAT SEEMS TO BE THE PROBLEM?

The Solution

Network chiropractic strives to create an environment to nurture healing. We do this by entraining (adjusting) your nervous system. This resolves a significant blockage to recovery from inappropriate dominant patterns. A more flexible, adaptable nervous system results.

In the office of a medical physician or therapist, the first question you'll probably be asked is: 'What seems to be the problem?'

After you explain 'What seems to be the problem?', diagnostic tests will be performed to name and treat what it seems to be.

If the problem disappears, you may have the illusion of health. This is the illusion with which most of us masquerade throughout life.

In our office you will not be asked 'What seems to be the problem?'

The reason is simple.

In our office we are not concerned with what seems to be. We are concerned about the reality. What is the problem and what can be done to correct it?

This is why we do not ask you about the effects of ill-health, the effects of a body and mind coordinated at less than its capacity, the effects of "blocked emotion" in the body or the effects of a nervous system which has not "released" old patterns.

Our Reality: There is an Innate Intelligence within you. This Innate Intelligence creates life force. We concern ourselves with the defense physiology, and its resulting interferences to the expression of your life force.

So next time someone asks you--'what seems to be the problem?' you may reply, 'it doesn't really matter, what seems to be. What matters is what can be done'.

-Within you is an Innate Intelligence.

-This Intelligence creates a Life Force.

-This Life force animates, motivates, repairs, heals, coordinates and inspires you.

-It is expressed through your brain and nervous system.

-It flows via nerves to each cell of your body.

-Nerve function can be altered by defense physiology.

-Defense physiology interferes with the expression of Innate Intelligence and its life force.

-Network spinal Analysis helps free this life force by entraining your nervous system to correct its defense physiology.
